

International Stemcell Services Ltd.

Your Health is Our Goal

Mission

To provide safe, reliable, and cost-effective stem cell banking and therapy options to people world-wide.

Vision

We aim to become the world-leader in providing stem cell banking and therapy services by focusing on better technology, lower costs and improved treatment outcomes.

About Us

International Stem cell Services Ltd. is a knowledge-based company providing state-of-the-art stem cell banking and therapy services to people worldwide.

Our Advantage

- **More than 25 years experience in stem cell research**
- **High quality expertise in stem cell processing**
- **Extensive experience doing clinical studies using stem cells**
- **Only company in India to have published data from clinical studies in peer-reviewed scientific journals**
- **One of the first companies in India to conduct ICMR-approved trials for stem cell therapy**
- **Over 100 patients treated successfully**
- **cGMP compliant processing centers far exceed most current industry standards**

Our Services

We offer adult stem cell therapy for a number of disorders including:

- Late-stage peripheral vascular occlusion

And

- Diabetic foot ulcers and non healing ulcers.
- Diabetic neuropathy.
- Chronic liver failure
- Spinal cord injury.
- Osteoarthritis
- Muscular dystrophy
- Myocardial infarction.
- Chronic Renal Failure (including Diabetic nephropathy)

Clinical Trials under way

- **Parkinson's.**
- **Multiple sclerosis**
- **Diabetes I and II**
- **Cancer vaccines.**
- **Non healing fractures.**
- **Stroke**

Our Unique Ayur-stem™

Only at ISSL do patients have the opportunity to get the unique combination of stem cell therapy

with Ayurveda-based wellness regimen. Just as the soil needs preparation before sowing, so does the body benefit from a cleansing program based on age-old Ayurvedic principles before getting treated with stem cells. Patients will undergo a specialized set of Ayurvedic treatment regimens tailored for their condition.

The resulting rejuvenating experience is the perfect complement to the regenerating therapy using stem cells.

Advantages of Our Treatment Approach

- **Autologous (patient's own) cell therapy eliminates risk of rejection**
- **Clinical studies have proven the safety and efficacy of the treatments**
- **More than 100 patients and not a single adverse event**
- **Minimal manipulation of your cells prevents complications and ensures safety**

- Harvested stem cells can be banked by us for future us - providing you with multiple opportunities for treatment
- All treatments performed by board-certified physicians who are experts in their field of medicine

Our Stem Cell Processing Centers

- Highly stringent cGMP (current Good Manufacturing Practices) standards
- All processing performed in cGMP compliant clean room with class 100 (<100 particles/cu ft) work areas
- Trained and experienced staff with minimum qualifications of M.S in Biotechnology/ Cell Biology

- **Center headed by highly experienced research scientists with doctoral degrees in cell biology/ biotechnology**

Our Therapy Centers

- **Highly qualified doctors who are specialists in their field of medicine.**
- **All treatments are performed in our well-equipped, world-class therapy center and specialist hospitals.**
- **Philips C-arm/ DSA equipment allows the doctors to deliver stem cells directly and specifically to the site where they are needed.**
